

Great North Care Record: BadgerNet (Maternity)

Scenario

This guide explains how to find information from BadgerNet providers in the Great North Care Record.
A summary of how to navigate each section is also included where applicable.

Who shares BadgerNet information?

The following organisation(s) share Maternity Data:

- Gateshead Health NHS Foundation Trust
- Newcastle upon Tyne Hospitals NHS Foundation Trust
- North Cumbria Integrated Care NHS Foundation Trust
- Northumbria Healthcare NHS Foundation Trust
- South Tyneside and Sunderland NHS Foundation Trust

BadgerNet

BadgerNet is the electronic patient record used by Maternity, to record and manage their patient data, within the North East and North Cumbria region. The Great North Care Record (GNCR) and the Local Maternity and Neonatal Systems (LMNS) have teamed up to work together to develop and start sharing maternity data, directly from their EPR, into GNCR.

BadgerNet will provide information into the following sections:

- Allergies and Adverse Reactions
- Care Plans
- Contacts
- Encounters
- Future Appointments
- Medication- To Take Out (TTO) Medication
- Mental Health
- Patient Demographics
- Pregnancy Related Information
- Pregnancy Summary
- Risk Assessments
- Social Context
- Vaccinations
- Vital Signs

Please note: This does not include Neonatal information currently.

A maternity-specific GNCR patient information leaflet has been coproduced and can be accessed on the NENC LMNS website - [Maternity Records Leaflet](#)

Allergies and Adverse Reactions

This section will show the Allergies and Adverse Reactions from:

- Gateshead Health NHS Foundation Trust
- Newcastle upon Tyne Hospitals NHS Foundation Trust
- North Cumbria Integrated Care NHS Foundation Trust
- Northumbria Healthcare NHS Foundation Trust
- South Tyneside and Sunderland NHS Foundation Trust

Allergies, Drug Risks / Warnings (1) Details							
Allergy	Reaction	Severity	Reaction type	Status	Date Onset	Comments	Source
Penicillin and derivatives	Anaphylaxis	severe	Allergy	Active			MAT

Care Plans

This section will show Maternity Care Plans from:

- Gateshead Health NHS Foundation Trust
- Newcastle upon Tyne Hospitals NHS Foundation Trust
- North Cumbria Integrated Care NHS Foundation Trust
- Northumbria Healthcare NHS Foundation Trust
- South Tyneside and Sunderland NHS Foundation Trust

The Care Plans will include:

- Planned Place of Birth
- Antenatal Management Plan
- Intrapartum Management Plan
- Postnatal Management Plan
- Risk Assessment

Care Plans (9) Summary

Obstetric Postnatal Care Plan

Actual management plan

3rd/4th Degree Tear POST OPERATIVE MANAGEMENT • Perform a rectal examination at the end of the procedure to ensure that suture material has not been accidentally inserted through rectal mucosa. If a suture (other than those used for a 4th degree tear) is identified, it should be removed. • The woman should be offered rectal non-steroidal anti-inflammatory analgesia at the end of the procedure, providing there are no contraindications. • Rectal NSAID use should be avoided following 4th degree tear. • Following extensive trauma, an indwelling catheter should be considered for 24 hours to prevent urinary retention. • The following post operative medications should be prescribed (there is a treatment bundle on JAC): o Oral paracetamol and NSAIDs should be offered for analgesia. Opioid analgesia may lead to constipation, so should not be considered first line. If required, use alongside a stool softener. o Co-amoxiclav 250/125mg TDS PO (or clindamycin 150mg TDS PO if penicillin allergic) for 5 days o Lactulose initially 15ml BD PO for 10 days - titrate to keep stool soft but not loose. Avoid bulking agents such as Fybogel as postpartum incontinence is more frequent. • Refer for physiotherapy and pelvic floor exercise for 6-12 weeks before discharge. • Information should be given to the woman regarding the extent of the trauma, pain relief, diet and hygiene. • Provide QE leaflet 'Third and fourth degree tears in childbirth' before discharge Test addition

Revised management plan

3rd/4th Degree Tear POST OPERATIVE MANAGEMENT • Perform a rectal examination at the end of the procedure to ensure that suture material has not been accidentally inserted through rectal mucosa. If a suture (other than those used for a 4th degree tear) is identified, it should be removed. • The woman should be offered rectal non-steroidal anti-inflammatory analgesia at the end of the procedure, providing there are no contraindications. • Rectal NSAID use should be avoided following 4th degree tear. • Following extensive trauma, an indwelling catheter should be considered for 24 hours to prevent urinary retention. • The following post operative medications should be prescribed (there is a treatment bundle on JAC): o Oral paracetamol and NSAIDs should be offered for analgesia. Opioid analgesia may lead to constipation, so should not be considered first line. If required, use alongside a stool softener. o Co-amoxiclav 250/125mg TDS PO (or clindamycin 150mg TDS PO if penicillin allergic) for 5 days o Lactulose initially 15ml BD PO for 10 days - titrate to keep stool soft but not loose. Avoid bulking agents such as Fybogel as postpartum incontinence is more frequent. • Refer for physiotherapy and pelvic floor exercise for 6-12 weeks before discharge. • Information should be given to the woman regarding the extent of the trauma, pain relief, diet and hygiene. • Provide QE leaflet 'Third and fourth degree tears in childbirth' before discharge Test addition REVISED management plan

Patient Agrees with the Plan? **Yes**

Pregnancy Episode

Start Date	End Date	Status
30/10/2023 08:56:37+00:00	Not available	Active

Please note: Actual plans are the management plan at the time of the appointment, usually made at the last appointment. If a revised management plan is present, this will show the amendments by the clinician at that appointment, and hence may contain changes to the care plan.

Care Plans will also appear in the Pregnancy Summary when there is an active pregnancy.

Contacts

This section will show Maternity Professional Contacts from:

- Gateshead Health NHS Foundation Trust
- Newcastle upon Tyne Hospitals NHS Foundation Trust
- North Cumbria Integrated Care NHS Foundation Trust
- Northumbria Healthcare NHS Foundation Trust
- South Tyneside and Sunderland NHS Foundation Trust

Go to **'Contacts'** and select the contact you would like to view.

Please note: Once the pregnancy is closed, the contact information will be removed. The pregnancy is closed on GNCR 6-14 weeks after a baby loss or a birth.

Oakes, Twin 1 - 10/04/2024 22:55:00+00:00	

Please note: All of this information is also displayed in the Pregnancy Summary widget, which appears on GNCR once an Antenatal Booking is completed, to 6-14 weeks after a birth or baby loss.

Pregnancy Summary

This section will show the Pregnancy Summary from:

- Gateshead Health NHS Foundation Trust
- Newcastle upon Tyne Hospitals NHS Foundation Trust
- North Cumbria Integrated Care NHS Foundation Trust
- Northumbria Healthcare NHS Foundation Trust
- South Tyneside and Sunderland NHS Foundation Trust

The pregnancy summary includes:

- Number of Babies in Ultrasound Scan
- Number of Babies Born
- Baby Birth Time
- Birth Outcome
- Birth Type
- History of Blood Transfusions
- Alcohol consumption
- Smoking Status
- Risk Factor(s)
- Estimated Date of Delivery
- Previous Pregnancies

The screenshot displays a 'Pregnancy Summary' widget with the following details:

- Active pregnancy detected:** (Callout 1)
- Number of Babies in Ultrasound Scan:** 2
- Estimated Date of Delivery:** Includes links for 'Estimated Date of Delivery by Scan' and 'Estimated Date of Delivery'.
- Planned Place of Birth:** 16/09/2024 [Planned Place Of Birth](#)
- Number of Babies Born:** 2
- Baby(ies) Birth Time:**
 - QUAYLE, Twin Two - 16/09/2024 16:04:00
 - QUAYLE, Twin One - 16/09/2024 16:02:00
- Baby(ies) Birth Outcome:** (Callout 2)
 - QUAYLE, Twin One - Livebirth
 - QUAYLE, Twin Two - Baby/Fetal loss - Antenatal Stillbirth - 10/09/2024 16:04:00
- Birth Type(s):** (Callout 3)
 - QUAYLE, Twin One - Caesarean section
 - QUAYLE, Twin Two - Caesarean section
- History of Blood Transfusion at Antenatal Booking:** Never
- Alcohol Consumption:** Includes link for 'Frequency of Drinking'.
- Risk Factor(s):** 16/09/2024 [Risk Assessments](#)
- Care Plan(s):**
 - 16/09/2024 [Obstetric Postnatal Care Plan](#)
 - 16/09/2024 [Obstetric Intrapartum Care Plan](#)
 - 16/09/2024 [Obstetric Antenatal Care Plan](#)
 - 16/09/2024 [Obstetric Antenatal Care Plan](#)
- Previous Pregnancy(ies):** (Callout 4)
 - 01/01/2021 [Previous pregnancies](#)
 - 01/01/2021 [Previous pregnancies](#)
 - 01/01/2019 [Previous pregnancies](#)

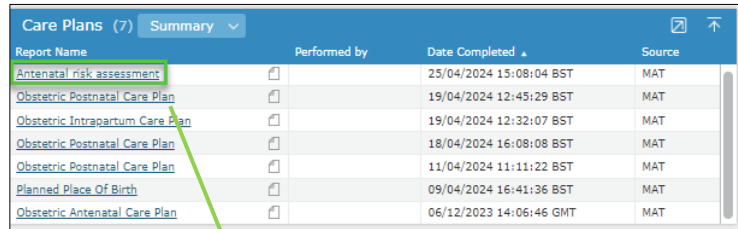

Please note: The Pregnancy Summary will appear when there is an **active pregnancy**. Once the pregnancy is closed, the Pregnancy Summary will disappear. The pregnancy is closed on GNCR 6-14 weeks after a baby loss or a birth. If information is still required, it can be found in the Miscellaneous Reports and Care Plans.

1. This section will say 'Active Pregnancy Detected' or 'Closed Pregnancy Detected'. The closed pregnancy will appear when the pregnancy has been closed on BadgerNet but the Pregnancy Summary is still appearing within GNCR (6 weeks post closure).
2. Birth Outcome will either identify a 'Live Birth' or 'Fetal Loss' – if there has been a loss the date of death will appear.
3. Birth Type will appear once a birth has occurred, it will tell you how the pregnant person gave birth, for example via a caesarean section or vaginal birth.
4. Any previous pregnancies will appear here. When you click on 'Previous pregnancies' the report will provide information on Date of Birth, Length of gestation at birth, Delivery finding and Birth Outcome.

Risk Assessments

This section will show the Maternity Risk Assessments from:

- Gateshead Health NHS Foundation Trust
- Newcastle upon Tyne Hospitals NHS Foundation Trust
- North Cumbria Integrated Care NHS Foundation Trust
- Northumbria Healthcare NHS Foundation Trust
- South Tyneside and Sunderland NHS Foundation Trust

Frequency of Drinking (units): Monthly or less	
Maternal pre-pregnancy alcoholic beverage intake: 5	
Alcohol consumption during pregnancy: 2	
AUDIT-C (Alcohol Use Disorders Identification Test - Consumption) score: 5	

Vaccinations

This section will show the Maternity Vaccinations from:

- Gateshead Health NHS Foundation Trust
- Newcastle upon Tyne Hospitals NHS Foundation Trust
- North Cumbria Integrated Care NHS Foundation Trust
- Northumbria Healthcare NHS Foundation Trust
- South Tyneside and Sunderland NHS Foundation Trust

The screenshot shows a software interface with a table of vaccinations and a pop-up window for details. The table lists various vaccinations with their dates and sources. The pop-up window provides detailed information for a specific Tetanus vaccination, including the date, time, route, site, note, dose, status, performer, and source.

Vaccination	Date Given	Source
Tetanus	30/04/2024 15:03:00 BST	MAT
Gamma Globulin	30/04/2024 15	
COVID-19	30/04/2024 14	
Whooping Cough	02/04/2024 13	
Influenza	02/04/2024 13	
Acellular Pertussis	02/04/2024 13	
Measles, Mumps and Rubella	02/03/2024 13	
Gamma Globulin	02/03/2024 00	
Pneumonia	02/03/2024 00	
Tetanus	01/01/2024 16	

Vaccination	Date Given	Route	Note	Dose	Status	Performed by	Source
Tetanus	30/04/2024 15:03:00 BST		Clinically recorded text		Completed	Bryden, Julie	BadgerNet/Maternity

Please note: In the 'Vaccination' column, the name of the condition you are vaccinating against will display, not the name of the medication/brand.

Vital Signs

This section will show the Maternity Vital Signs from:

- Gateshead Health NHS Foundation Trust
- Newcastle upon Tyne Hospitals NHS Foundation Trust
- North Cumbria Integrated Care NHS Foundation Trust
- Northumbria Healthcare NHS Foundation Trust
- South Tyneside and Sunderland NHS Foundation Trust

The screenshot shows a software interface with a table of vital signs. The table has columns for Name/Measurement, Value, Reference Range, Date Resulted, and Source. A single row is visible, showing Systolic blood pressure/Diastolic blood pressure with a value of 150/90 mmHg, a date of 17/01/2024 13:47:00 GMT, and a source of MAT.

Name/Measurement	Value	Reference Range	Date Resulted	Source
Systolic blood pressure/Diastolic blood pressure	150/90 mmHg		17/01/2024 13:47:00 GMT	MAT

The Vitals Signs will include:

- BMI
- Body Height
- Body Weight
- Blood Pressure – only the booking blood pressure and most recent will appear.
